****EVENT COMMENT BY berkey**** : Fri Aug 16 07:55:43 HST 2013

A non event happened.

____end____

WEATHER COMMENT: berkey: Fri Aug 16 08:04:52 HST 2013

coronal skies, temp 50, no wind

____end____

COMP COMMENT BY berkey: Fri Aug 16 08:08:53 HST 2013

No COMP obs today, due to lack of guider and warm camera.

____end____

PSPT COMMENT BY berkey: Fri Aug 16 08:09:15 HST 2013

Pspt looks like it is working.

____end____

**COMP PROBLEM COMMENT BY berkey **: Fri Aug 16 08:09:26 HST 2013

All the CoMP electrics are off. Observing canceled today.

____end____

**K-Cor PROBLEM COMMENT BY berkey **: Fri Aug 16 08:10:10 HST 2013

K-Cor is in boxes no observing at either spar today.

____end____

K-Cor COMMENT BY berkey: Fri Aug 16 08:10:47 HST 2013

Rack space for kcor at mlso is clear and available

____end____

GONG COMMENT BY berkey: Fri Aug 16 08:11:24 HST 2013

Gong looks fine

____end____

GONG PROBLEM COMMENT BY berkey : Fri Aug 16 08:11:32 HST 2013

No problem here.

____end____

PSPT PROBLEM COMMENT BY berkey : Fri Aug 16 08:12:05 HST 2013

Pspt looks fine right now, but it MAY crash at some point today.

____end____

GENERAL OBSERVATORY COMMENT BY berkey: Fri Aug 16 08:12:39 HST 2013

I found a home for the old 19" half racks in NOAA storage. They are on the mountain and available when needed but wont take up MLSO realstate. (Note there are 4 of these weird 1/2 rack sections that used to make up the nahenahe/kii observatio n station. Not the typical full height racks. When needed (say for FPI) we can go down to the storage room and pick them up.

____end____

GENERAL PROBLEM COMMENT BY berkey : Fri Aug 16 08:14:56 HST 2013

We aren't doing any spar observations due to lack of guider. Too bad with such nice skies today.

Fri Aug 16 08:48:51 HST 2013: PSPT Start Patrol

Possible CME in Progress berkey: Fri Aug 16 11:48:46 HST 2013

*****CME COMMENT*****

A Cme was not seen, we have no coronal instruments today. This is a test of a command.
____end____
