CoMP COMMENT BY berkey: Mon Aug 26 17:20:18 GMT 2013

Starting cooling comp for guider tests later today. Since spar is slightly off balance in Dec I decided to fill at zenith . With the current funnel setup this is a rather cryo inefficent way to fill the dewar but we have a delievery scheduled for next week and we havent touched the 270 dewar for almost 2 weeks so we should be ok.

GENERAL OBSERVATORY COMMENT BY berkey: Mon Aug 26 17:22:04 GMT 2013

Shabar laptop setup up in a temp spot ontop of a cabinet. I will try to take some data with Shabar as well today.
