KCOR COMMENT BY berkey: Thu Aug 29 02:16:34 GMT 2013

Progress today. Spar has been drilled and tapped the drill templates have been removed and the O1 sub-assembly has been installed on the spar. The SBS system was rebuilt with the new rails and reinstalled on the west face of the spar.

Down stairs work today included rebuilding the shutters with the new springs, mounting of the occulter post to the field lens and running a few of the dome->control room wires for k-cor and sgs.
