**KCOR PROBLEM COMMENT BY stueben **: Thu Oct 3 23:00:25 GMT 2013

Shutdown the Nema enclosure and the PC, then restarted Nema enclosure before starting the PC. This seems to have fixed most problems - socketcam captures images

with no errors. One oddity remains - polarizer won't home or rotate, this seems like software. In the mechanism controller window GetMotorState and

GetSafetyInputPort both show 0.
