**KCOR PROBLEM COMMENT BY stueben **: Fri Nov 22 00:48:08 GMT 2013

Worked with Brandon today to figure out why the ILX couldn't be read from the ethernet. It seems that the B&B interface box reset its address to the default value when the new driver was loaded. We changed the address to its intended value and can now read the ILX. The Labview code now needs to be updated to actually read the ILX, which Ben will do.
