KCOR COMMENT BY berkey: Mon Jan 27 19:59:50 GMT 2014

Cleaned Kcor ol this morning. I am really looking forward to do this with flow booth and O1 holder in the future. With the current setup it seems like dust is deposited almost as quickly as it can be washed away. I also feel it is a bit risky to hand hold a semi-wet heavy optic while cleaning.

GENERAL OBSERVATORY COMMENT BY berkey: Tue Jan 28 00:04:46 GMT 2014

60 arcsecond oscillation seen on the spar. This might be part of the reason we are seeing more spill on Kcor

KCOR COMMENT BY berkey: Tue Jan 28 01:09:13 GMT 2014

As a test I put the spring/fall occulter the kcor beam train. Just as with the winter occulter I see a large blooming above the occulter.
