**KCOR PROBLEM COMMENT BY stueben **: Wed Apr 9 01:20:37 GMT 2014

I started the replacement of the FO cables. The broken cables have been removed
and the one new cable is strung. The cable end marking was a bit odd - the

downstairs cable link boxes are marked A and B and the cables plug in at

connectors marked L1 and L2, at the telescope the FO cable ends are marked T and R and there is no L1/L2 marking. I additi
onally marked the cable link boxes

with T and R and upstairs I added T and R near the connector locations for L1.
