GENERAL OBSERVATORY COMMENT BY berkey: Sat Aug 2 01:00:40 GMT 2014

Wind now about 20mph from the East with blowing rain.

Hatches battened, its going to be a wet night.

GENERAL OBSERVATORY COMMENT BY berkey: Sat Aug 2 01:30:54 GMT 2014

Wrote a new script to avoid the issue we had in the past where I fat fingered and sent the wrong daylog. The new command sendToday will send today's day log off to everyone, without requiring the observer to be able to type a 5 digit number (so mething I failed at least one this week).

So far it looks like the script works but I ha ven't done the final test which will come at the end of the day.

GONG COMMENT BY berkey: Sat Aug 2 01:31:54 GMT 2014

Monthly gong pm proformed today. But I am guessing we may end up with some water spots on the window after today.
