GONG COMMENT BY berkey: Thu Oct 9 01:48:34 GMT 2014

Gong UPS output power line, burned one if its output pins where it plugs into the the building. UPS is currenlty off and unplugged. Gongsters are looking into what to do next; but this looks bad enough to require a PM visit. Gong also plans to replace the batterys in the UPS last replacement was in June 2009. We found compatible batteries for ~230 each at Intestate in Hilo.

The burnt out plug is now hanging out in front of the UPS incase anyone wants to see it.
