Year: 14 Doy: 358

Observer: waters

WEATHER COMMENT: waters: Wed Dec 24 17:07:48 GMT 2014

Thick clouds surrounding much of the horizon at present. Temp 38F with windspeed at about 24mph from the Southwest with gusts up to 35mph. Will wait to open domes for clearer skies and a bit calmer winds.

GENERAL OBSERVATORY COMMENT BY waters: Wed Dec 24 17:52:21 GMT 2014

There's some plywood on the East side of the building that had decided to wander a bit. Managed to move it back over to the building and weighed it down with some rocks. I'd move it into the building but the wind isn't letting me lift it very easily.

GENERAL OBSERVATORY COMMENT BY waters: Wed Dec 24 18:22:53 GMT 2014

Some wet, light fog coming down from the South, making some pretty awesome rainbows.

GENERAL OBSERVATORY COMMENT BY waters: Wed Dec 24 21:04:32 GMT 2014

Wind has died down a bit, between 18-23mph from the Southwest. Might be able to open up once the clouds and wet fog lift.

GENERAL OBSERVATORY COMMENT BY waters: Wed Dec 24 22:55:21 GMT 2014

Heading down now, wind is starting to gust up to 60mph and it's getting hard for me to open the doors.
