\*\*PSPT PROBLEM COMMENT BY stueben\*\* : Tue Jan 20 23:47:19 GMT 2015

The dome rotation is working again, the home switch problem was a software issue

, the home event needed to be reset which I was only able to do with the "init

sys" command. We still cannot observe however due to a problem with the sun

workstation. The normal user account pspt1 has disappeared from the hard drive.

The account problem has been fixed with the help of Alice which I've been

making this log entry, so we should now be ready to observe.
