PSPT COMMENT BY waters: Sun Jan 25 21:19:10 GMT 2015

Pspt control panel just shut down for no reason. I'm not entirely sure how or why that happened. When I restarted the program, it froze for a couple of minutes. Starting it up again and will see what happens.

GENERAL OBSERVATORY COMMENT BY waters: Mon Jan 26 02:30:48 GMT 2015

I forgot to mention, this morning when I was opening the upstairs dome, it sounded like ball bearings were falling. I looked at the wheels that I could see and it doesn't look like any lost their own. Not sure what to make of it.
