Mauna Loa Solar Observatory Observer's Log \_\_\_\_\_\_ Sun May 17 16:13:29 GMT 2015 Year: 15 Doy: 137 Observer: waters WEATHER COMMENT: waters: Sun May 17 16:13:33 GMT 2015 A bit of cirrus coming up from the South-Southwest, otherwise clear skies. Temp 41F with windspeed at about 10mph from the Southeast. end Sun May 17 16:50:40 GMT 2015 COMP Start Patrol COMP COMMENT BY waters: Sun May 17 16:47:02 GMT 2015 Comp occulter in the horizontal position was at 0 instead of 79800. Called Ben to help trouble shoot since it wouldn't res pond through the focus GUI. Just so it's here: three toggles on the back of Comp. Want the three leds on the toggles to be orange, if green, press toggle in to change to orange. If red, hold down till flashes and then becomes solid again. At th at point it's homing the occulter. Once it's solid, make sure that led is orange before heading back down. Close the Comp GUI and reopen it. Go to file open, click file move-opal.vi. Click the little switch to close and run the Comp GUI. Once d one, run the Move-Opal GUI and it will place the opal in beam. Once done, go to center occulter and get the value that was low up in the 70,000-76,000 range. Then move opal out (open) and center the occulter as normal. Thank you Ben! end Sun May 17 16:59:37 GMT 2015 CoMP Paused for clouds GENERAL OBSERVATORY COMMENT BY waters: Sun May 17 16:59:35 GMT 2015 Cirrus has made it across the sky and currently crossing the Sun. Comp and Kcor idled. Sun May 17 18:49:42 GMT 2015 CoMP Restarted from pause Sun May 17 18:49:42 GMT 2015 COMP End Patrol GENERAL OBSERVATORY COMMENT BY waters: Sun May 17 20:30:26 GMT 2015 Thought there was a nice hole to start up the instruments but trying to adjust Comp says otherwise. Oh well, will wait for btter skies. end GENERAL OBSERVATORY COMMENT BY waters: Sun May 17 21:52:19 GMT 2015 Finally got some clear skies but a cloud bank came up fast from the West. Dome closed till it passes. GENERAL OBSERVATORY COMMENT BY waters: Sun May 17 23:11:52 GMT 2015 Fog to the South and West of the observatory with a nice blue window above. Here's to hoping the fog dissipates soon. end GENERAL OBSERVATORY COMMENT BY waters: Sun May 17 23:55:10 GMT 2015 There's an opening, starting up instruments, end Sun May 17 23:57:35 GMT 2015 COMP Start Patrol Mon May 18 00:00:20 GMT 2015 KCOR Start Synoptic Patrol Mon May 18 00:05:45 GMT 2015 KCOR End Patrol Mon May 18 00:06:24 GMT 2015 COMP End Patrol GENERAL OBSERVATORY COMMENT BY waters: Mon May 18 00:07:22 GMT 2015 A little bit of everything came with that; clouds/cirrus started to cross the Sun and some fog came up with the cloud. Dom

e closed again.

GENERAL OBSERVATORY COMMENT BY waters: Mon May 18 01:56:31 GMT 2015
Gave a tour to 12 visitors from France. The same tour guide from last year came up and was surprised that he caught me up here after so long. It was a pleasure to have them, although it made me releaize that I need to brush up on my public spe aking skills, among other things. It was wonderfully to have them! A good end to an otherwise slow day!
