KCOR COMMENT BY berkey: Mon May 18 16:40:36 GMT 2015

Last night after observing was over I logged in remotely and took a series of darks with the lookup tables turned off. Since the remote connection slightly taxes the computer resources there was an elevated number of dropped frames on some of the images; however I don't think that will effect the collected data.

Dark data with Luts turned off. Lots of lagged frames

Exp time	Data valid	sum cam1	sum cam2
1 msec darks	03:15:59-03:16:46	2.47e9	2.63e9
.1 msec darks	03:19:32-03:20:20	3.53e9	3.59e9
.2 msec darks	03:22:08-03:22:55	3.48e9	3.48e9
.3 msec darks	03:24:03-03:24:50	3.38e9	3.39e9
.4 msec darks	03:25:55-03:27:13	3.31e9	3.27e9

KCOR COMMENT BY berkey: Mon May 18 20:04:32 GMT 2015

For a test we are trying to take some kcor data with the 1-to-1 LUTS applied instead of nominal LUTS that were created in 2013-12-03. However when starting socketcam with tables, the following error.

Image read error:

Only read 8192 bytes to C:/kcor/lut/lut_cam0_quad0-1to1.bin
Expected 16384.

Looks like the 1-to-1 luts were built before we moved to 16bit integers.

-Ben
