\*\*PSPT PROBLEM COMMENT BY stueben\*\* : Fri Sep 18 00:31:22 GMT 2015

Investigated the serial port to the ccd camera today using the rs232 tester that greg sent. I could not see any activity on the ccd port when running the sun

pspt program. If I entered a multiple exposure command (exp 46 10 1) from the pc I could sometimes see a very brief green flash on RD. If I put the tester on the

sun to pc port I could easily see green flashes on both TD and RD.
