GENERAL COMMENT BY berkey: Wed Dec 09 19:11:55 GMT 2015

Dog house roof is starting to hum/resonate in the wind. Think we are now getting 25mph winds with guys to 35-40.

KCOR COMMENT BY berkey: Wed Dec 09 19:50:19 GMT 2015

Doing some testing to add a feature to abort the calibration script early. This testing is stand alone with out running the full kcor labview code or socket cam. The 19:46:41 Start calibration a future automatic calibration log entries should be ignored until further notice.

GENERAL COMMENT BY berkey: Wed Dec 09 21:19:17 GMT 2015

Wind has tapered a bit. Still to windy for observing but it doesn't sound like the building is getting beat up.

GENERAL COMMENT BY berkey: Thu Dec 10 00:14:36 GMT 2015

Contractor will be up Friday to look into dome and conduit logistics. It now looks like the crane work could slip until 2016 due to contracting and Holiday scheduling.
