
Mauna Loa Solar Observatory Observer's Log

Sun Feb 7 16:55:43 GMT 2016

Year: 16 Doy: 038

Observer: waters

WEATHER COMMENT: waters: Sun Feb 7 16:55:51 GMT 2016

Temp 34F with windspeed at about 15-20mph from the West-Southwest. Clouds are just above 11,500ft and move fast across the sky. Feels like winter weather on the mountain, frost all over the ground and the board walk was slick. Road was frosty from 9,000ft up but perfectly fine for driving.

GENERAL OBSERVATORY COMMENT BY waters: Sun Feb 7 17:12:00 GMT 2016

Currently working on getting the data streams up on Hale. A lot closer than I was on Friday but a little ways to go.

____end____

GENERAL OBSERVATORY COMMENT BY waters: Sun Feb 7 17:26:19 GMT 2016

Currently getting gusts up 30mph, will wait for calmer winds before opening.

____end____

GENERAL OBSERVATORY COMMENT BY waters: Sun Feb 7 20:44:37 GMT 2016

Wind is gusting up to 40mph. Here's to hoping it calms down.

____end____

GENERAL OBSERVATORY COMMENT BY waters: Sun Feb 7 22:02:32 GMT 2016

Lost power briefly.

____end____

GENERAL OBSERVATORY COMMENT BY waters: Sun Feb 7 22:57:55 GMT 2016

Haven't made much progress on Hale. Going to head down. Wind is making it hard to open doors and walk outside. Hope tomorrow is calmer.
