GENERAL COMMENT BY berkey: Mon Apr 04 23:53:29 GMT 2016

Doing a dark test for kcor calibration.

Dome closed, ND filter in, shutter in, telescope plotting at the wall, apature covered by a black blanket.

Hopefully this will show the change in dark intensity as the array cools off from sunlight exposure. Darks start at 23:23:26 and I ran the darks until the intensity sums appeared to stop going down. About 23:47:00

KCOR COMMENT BY berkey: Tue Apr 5 06:14:47 GMT 2016

Taking some night time dark data. To get the darkest darks we can.

____end____

KCOR COMMENT BY berkey: Tue Apr 5 06:15:19 GMT 2016
Data starts at: 2016044_061539 -> 062603.

Values look to be about 10% lower then the darkest I saw this afternoon. I am not sure if this is temp of phtoon related.
