KCOR COMMENT BY berkey: Sat Jun 25 00:39:43 GMT 2016

Blew off O1. Loks like it collected a bunch of spots around 21:10 UT. I am not sure what happend but I don't really remember seeing that many spots show up between two normalized kcor images. In blowing off the O1 I confirmed quite a few small peices of junk that were not on the lens at startup this morning.

CoMP COMMENT BY berkey: Sat Jun 25 00:40:00 GMT 2016

Per request CoMP O1 was washed.

\_\_\_\_end\_\_\_\_

GENERAL COMMENT BY berkey: Sat Jun 25 01:10:02 GMT 2016

Sky now dominated by cirrus.
