GENERAL COMMENT BY berkey: Fri Aug 26 16:51:03 GMT 2016

Merid DEC oscillation on the guider. Briefly going to open loop seemed to fix the issue but we may have bad pid coefficients.

Sat Aug 27 00:45:28 GMT 2016 SGS Alignment complete

KCOR COMMENT BY berkey: Sat Aug 27 00:52:44 GMT 2016

Washed the kcor ol today. I think I got most of the residue off but some still remains. Cleaning stopped when wipes ran out.

On reinstallation I found the alignment off a bit in the same direction we were off after the optical tube painting. Visual inspection showed obvious issues. So with a good alignment on COMP I backed the 3 bolts holding the O1 against its holder and found I could get back to this morning's alignment by adding some shims behind the O1 toward the spar. Currently I am trying to take some data to see how the images look with the shims.

Sat Aug 27 01:37:59 GMT 2016 COMP End Patrol

GENERAL COMMENT BY berkey: Sat Aug 27 02:11:35 GMT 2016

Images look ok modulo aerosols, we will have to check tomorrow's data for fringes.
