GENERAL COMMENT BY berkey: Tue Sep 13 02:36:45 GMT 2016

Kind of a crummy cloudy day. Looks like there was an interesting coronal loop in the NW but fog blew in before we could see it evolve.

I did work a little with Qian today to talk about installing his GPS unit. Looks like we need a little more paper work with NOAA and to figure out the proper pipe/post before we can install it on some 2 person day at MLSO.
