GENERAL COMMENT BY berkey: Thu Sep 29 02:22:31 GMT 2016

I think I got Qian's GPS up and running today. Needed to change the way it mounted the external disk but once that was done the software seems to be running.

My calculations suggest that it generates about 19Gb/day so if it takes data continuously at this rate we will have to plan on swappign hard drives a little over once a month.
