CoMP COMMENT BY berkey: Mon Nov 07 19:48:06 GMT 2016

Took some distrotion mask data in CoMP.

Since we wont be observing anyway I took 1074, 1079 and 1083 data a couple times.

The small dots look slightly out of focus but otherwise things look good. All data between 093020.fts->-094101.fts contain data related to the distortion test (darks or masked data).
