GENERAL COMMENT BY berkey: Thu Nov 10 02:06:24 GMT 2016

Today we had a big tour of geologist that happened to pass through the observatory after they walked out to the lava barrier to hear a talk from the guy who designed the barrier.

I also moved some of the excess packing material down to the shipping container. If anyone needs to pack a 19" crt monitor there are two big Fedex boxes filled with foam and bubble wrap in the red container.

But overall it's been another disappointing day with light cirrus overcast obstructing the corona all day.
