GENERAL COMMENT BY berkey: Tue Nov 15 02:57:19 GMT 2016

The spare guider has been temporarily installed on the spar near the middle of the Chromag face.

The guider was tested with the SGS electroics and seems to work with resonable proformance; after swapping the inputs in QUAD CELL filter samples.vi.

Note on the south face quad cell output

0 maps to (-RA)

1 maps to (+DEC)

On the Chromag face

0 maps to (+DEC)

1 maps to (+RA)

Once we could guide with the temp scope, it was mechanically aligned to Kcor. To be ready for future testing to see if the alignment changes over the next couple days.

Hardware has been reverted to the standard guider. Testing shows nonimal operation.
