KCOR COMMENT BY waters: Sat Dec 24 17:22:14 GMT 2016

Came up with the SPiiPlus Exception error again; going through the SPiiPlus recovery steps that Ben sent out. Worked like a charm. One thing to note is that the O1 focus position is usually out of focus after this error and that the O1 focus is normally around 133mm, so move the focus position to about 133mm before putting the spar on the Sun.

I think socketcam crashed when I stopped Kcor data acquisition. But the program stopped and socketcam quit when i issued the quit command, so I'm not entirely sure....
