GENERAL COMMENT BY berkey: Tue Jan 10 00:00:07 GMT 2017

We have a high temp inversion right now leading to haze around the observatory. I am also noticing some cloudy haze blowing in from the south when looking at the building cam.

GENERAL COMMENT BY berkey: Tue Jan 10 02:55:20 GMT 2017

This afternoon UH did some fail over testing of the new networking equipment. Everything seemed to go as expected. This seems to be a good sign for us when we get around to moving the observatory over to that link.
