Sat Feb 25 02:18:18 GMT 2017 Kcor Focus/alignment program exited

KCOR COMMENT BY berkey: Sat Feb 25 02:25:38 GMT 2017

The O1 focus motor prox flag was rebuilt today to trigger a -EOT limit (at about 127mm) before the poron gasket can bent/p
inched.

A new hard limit stop was also installed just above the hepa input pipeing which supplies air to the telescope tube. This
hard limit is a couple mm below the soft limit and should prevenet the O1 from falling against gravity (and damaging the
gasket) during power outages.
