GENERAL OBSERVATORY COMMENT BY waters: Mon Mar 6 18:16:54 GMT 2017
Had a bit of trouble with Kcor this morning. The MC4U controller gui wasn't reading out the temp of Kcor and restarting it
did not help. Restarted the computer. However, we then got a camera error. We restarted the computer but that did not hel
p. We ended up restarting the nema box upstairs as well as the intelligent power controllers both downstairs and in the ne
ma box upstairs. This got everything up and running again.

GENERAL OBSERVATORY COMMENT BY waters: Mon Mar 6 22:03:44 GMT 2017
Ben showed me how we lube the worm gear. Also got to see what he did when he rebuilt the O1 focus motor prox flag. We migh
t work on the motor prox flag because when we checked it, the one that was installed was bent.
GENERAL OBSERVATORY COMMENT BY waters: Mon Mar 6 22:16:13 GMT 2017
We had some students from Cornell stop by for a tour.
GENERAL OBSERVATORY COMMENT BY waters: Mon Mar 6 22:27:06 GMT 2017
Currently going in and out of clouds at present. Instruments idled until they pass.

GENERAL OBSERVATORY COMMENT BY waters: Mon Mar 6 22:46:14 GMT 2017
Comp occulter adjusted
end
Mon Mar 06 22:49:20 GMT 2017 KCOR End Patrol
Mon Mar 06 22:50:03 GMT 2017 CoMP Paused for clouds
GENERAL OBSERVATORY COMMENT BY waters: Mon Mar 6 22:50:07 GMT 2017
Clouds passing again.
end
Mon Mar 06 22:53:13 GMT 2017 CoMP Restarted from pause
Mon Mar 06 22:54:13 GMT 2017 CoMP Paused for clouds
GENERAL OBSERVATORY COMMENT BY waters: Mon Mar 6 23:04:17 GMT 2017
Getting some gusty wind every now and again. Up to about 25mph frrom the West. Closing the dome for a little bit until it
calms down.

Inspection of the new O1 focus limit switch flag installed Feb 24 found it had some mechanical issues due to the light we ight sheet metal used in its construction. Flag has been removed pending construction of a more permant limit flag. Hard limit stop has also been removed.

As a tempoary solution a soft limit has been implemented in the foucs VI which should prevent moves pass the nonimal end of travel. It is still possible to drive the O1 past the the limit with other vi/software but this should cover all normal operational moves of the focus motor.
