KCOR COMMENT BY waters: Fri Mar 17 18:20:15 GMT 2017

We are seeing a ring around the Sun in bothe data streams we have up. It's more prominent in the normalized data stream.

Going to trouble shoot now.

KCOR PROBLEM COMMENT BY berkey : Fri Mar 17 18:48:46 GMT 2017

Bright ring that is about 1/4 solar radii was observed around the occulter in this mornings data (normalized and quick look images) inspection revealed that the occulter was not properly seated on the post. Removing the occulter and reinstalling it with a ~5 degree different clocking seems to have cleared up the ring.
