Upon arrival this morning it looked like the clouds might clear, but instead they have gotten worse - the cirrus is denser and now orographic clouds are coming up.

GENERAL COMMENT BY stueben: Fri Jun 16 01:30:59 GMT 2017

Cloudy all day, no data. The construction crew put on the new outer dome door and painted about 75% of the floor, they will be back tomorrow to finish. Leaving the dome windows open over night to clear the fumes from the paint.
