KCOR COMMENT BY waters: Fri Jun 16 16:14:31 GMT 2017

Kcor temperature was at 10.3C when I came in, a result of leaving the windows in the dome open all night. Almost back up to temperature.

KCOR COMMENT BY waters: Fri Jun 16 18:29:57 GMT 2017

The comment earlier about the drop in temp for Kcor due to the windows open might actually be from the ups failure that we had yesterday. The output button wasn't on when I came in and I pressed it this morning to bring it back up to temp.

****EVENT COMMENT BY waters**** : Fri Jun 16 20:55:33 GMT 2017

Sun seems to be active this morning. At PA 255 and 305, it looks like there are two prominences to be launching. Can be seen in GONG.

GENERAL COMMENT BY waters: Sat Jun 17 01:44:47 GMT 2017

Cirrus and clouds have been our constant companion all day today. No data unfortunately.

GENERAL COMMENT BY waters: Sat Jun 17 01:47:15 GMT 2017

Two of the three windows are open upstairs and there are planks leading from the dog house into main dome area so we keep off the floor this afternoon (the floor is hot lava).
