Observer: waters

Tue Jun 27 16:22:38 GMT 2017 CoMP occulter has been re-centered

WEATHER COMMENT: waters: Tue Jun 27 16:24:18 GMT 2017

Temp 47F with windspeed at about 7-12 mph from the South. There's a band of cirrus on the eastern horizon wrapping around to the North. The sky looks a little bright; will wait for the band to pass over the Sun before starting instruments.

GENERAL COMMENT BY waters: Tue Jun 27 21:29:50 GMT 2017

A nice swirl of cirrus is currently in a holding pattern over the Sun; instruments idled for now.

GENERAL COMMENT BY stueben: Wed Jun 28 02:35:19 GMT 2017

Nice day, mostly clear except for a few short periods of passing cirrus. Good seeing early, aerosols visible from startup with variation throughout the day depending on wind direction.
