WEATHER COMMENT: stueben: Thu Aug 24 19:53:50 GMT 2017

Brisk east winds with gust up to 25 mph are causing some spare buffeting. Raised the lower shutter door and rotated the dome as far south as possible to reduce the buffeting.

GENERAL COMMENT BY stueben: Fri Aug 25 02:02:31 GMT 2017

Nice day, very good early seeing but some aerosols. Brisk east winds kept seeing good most of the morning aerosols increased more than expected for brisk east winds, seeing degraded in the afternoon.
