Thu Sep 14 02:19:55 GMT 2017 CoMP Paused for clouds

Log Type BY berkey: Thu Sep 14 02:33:53 GMT 2017
Added another drop down menu to the logger. For routine PMS.

If the log text input window is blank selecting something from the PM list will automatically populate the text input with a default comment. These comments should make it easier to search the logs for when events occurred. Currently the list is only populated with actions related to cleaning the lenses but it is very easy to add more to the list.

The next few entries in the log will be a demonstration of the new feature and do not correspond to actual optics cleaning.
