GENERAL OBSERVATORY COMMENT BY waters: Thu Oct 26 19:04:19 GMT 2017
Still just a bit of cirrus crossing the sky at the moment, CoMP looks fine however, you can see it still in Kcor. Waiting
a bit longer to start up Kcor but CoMP looks wonderful. Thank you Ben!!!

GENERAL OBSERVATORY COMMENT BY waters: Thu Oct 26 19:20:59 GMT 2017
Checking Kcor start real quick. The images at the start of the day was uniform. Currently trouble shooting with Ben.
Thu Oct 26 20:04:32 GMT 2017 KCOR Start Synoptic Patrol
KCOR COMMENT BY waters: Thu Oct 26 20:02:59 GMT 2017
Ben had me look at the images coming in at start up with the diffuser and polarizer out of the beam to see if socketcam ca
me up in the right position. As I started up, I looked in the Y: drive on the shabar computer, under gallery\kcor and chec
ked the lastest image. Luckily, it looks like socketcam started up correctly this time. Images look much better than at st
art up. Hopefully, when Ben comes back up tomorrow, he can flush out the cause. Thank you for your help!

GENERAL OBSERVATORY COMMENT BY waters: Thu Oct 26 21:21:40 GMT 2017
The door leading into the dog house can be pushed open without moving the handle, regardless if it's locked or not. I trie
d to pull/push it closed and you could still push/pull it open without moving the handle.

Thu Oct 26 21:35:06 GMT 2017 KCOR Start Synoptic Patrol
GENERAL OBSERVATORY COMMENT BY waters: Thu Oct 26 21:59:02 GMT 2017
We might have a faulty safety valve on our liquid nitrogen dispensesr. It went off when I filled our dewar. After about fi
ve to seven minutes, it stopped releasing nitrogen but we should keep an eye on it everytime we use it.
