GENERAL COMMENT BY berkey: Fri Feb 16 20:46:56 GMT 2018
Shabar got RA axis got stuck; due to cables catching the mount.
Realigned it; but looks like we got a peroid of bad data.

GENERAL COMMENT BY berkey: Sat Feb 17 01:07:23 GMT 2018
Dome clsoed and shabar brought in for light mist blowing thru.
___end___
GENERAL COMMENT BY berkey: Sat Feb 17 02:05:30 GMT 2018
Sgs reverted to all MLSO hardware with + ethernet dongle.

As a test we found that; with link speed forced to 100mbs the onboard ethernet controller would allow windows to function
if the etherent cable was connected after boot.  But the system would get stuck at the bios most of the time.   Not sure
how to disable the link speed testing at the BIOS; so this isnt really a solution.
