GENERAL COMMENT BY berkey: Thu Apr 26 00:42:18 GMT 2018

Shabar wouldnt detect the DAQ this morning. Looks like the isuse was related to dirt/debris in the USB extension cord. T  
oday shabar data today we ran with a spare usb cord (currently on the old clean bench table).

In the intrum the usb connector was cleaned out (lots of bits came out), and it appears to be functinoal again. If shabar  
doenst come up with resonable values over the next couple days I recommend running with the spare cable instead.
