Year: 18 Doy: 196

Observer: waters

WEATHER COMMENT: waters: Sun Jul 15 16:08:59 GMT 2018

Temp 42F with windspeed at about 4-9mph from the South. Scattered bands of cirrus across the sky and it looks a little bright out. Vog is at 11,000ft.

GENERAL OBSERVATORY COMMENT BY waters: Sun Jul 15 17:38:42 GMT 2018

The MC4U GUI modulator temp seems to be reading 0 and 35 off and on. Lightwave box is reading normally. Stopped and restarted the MC4U controller, switched to the MC4U testing GUI and restarted the computer. Doesn't seem to be working. Also did a full reboot of the system. Even checked the cables to the lightwave box but not sure why it's doing it.

GENERAL OBSERVATORY COMMENT BY waters: Mon Jul 16 01:25:07 GMT 2018

Unfortunately no data today. Cirrus, clouds, fog and thunder claimed the day.
