WEATHER COMMENT: stueben: Sat Aug 25 19:34:22 GMT 2018

Lane has been degraded to a tropical storm and is now north of the Big Island. It is moving very slowly however and will continue to affect the weather at MLSO for a few days. The east side of the island has received most of the rain with total rainfall over the last few days up to 40 inches in some places. The west side has received some rain but it has been 10% or less than the east side. Mauna Loa road shows little effects of heavy rain. The MLSO ground floor and dome show no water leaks.
