GENERAL COMMENT BY berkey: Sat Feb 02 02:23:12 GMT 2019
Network issues all day.
```

Looks like some of the radio gear the the mountain may be at fault.

At this point the network seems really bad (I cant open an email). But the UH network folks seem to say we are now in goo d shape. I am not sure if the network is still broke or if we just have a gaint back log of data tring to push thru.
