****KCOR PROBLEM COMMENT BY stueben**** : Sat Mar 02 19:20:16 GMT 2019

I've been unable to get kcor running so far today. When I start focus.vi there is a Labview error related to the Photon Focus Toolkit. Rebooting the kcor pc doesn't help.

****KCOR PROBLEM COMMENT BY stueben**** : Sun Mar 03 00:04:06 GMT 2019

The fiberoptic connection boxes to the cameras indicated a loss of camera clock from the Tcam. Swapping camera power and data cables the problem always followed the camera. My deduction is that there is a problem with the Tcam itself rather than any of the cables, power supplies or fiber link components.
