Mauna Loa Solar Observatory Observer's Log ______ Fri Mar 8 17:14:35 GMT 2019 Year: 19 Doy: 067 Observer: berkey WEATHER COMMENT: berkey: Fri Mar 08 17:17:58 GMT 2019 Temp: 32.1f, Humidity: 28%, Pressure: 28.811in, Wind: 8mph from 178degs, Skies: clear end Fri Mar 08 19:28:25 GMT 2019 SGS Alignment complete Fri Mar 08 19:32:37 GMT 2019 Kcor Focus/alignment program exited GENERAL COMMENT BY berkey: Fri Mar 08 19:34:57 GMT 2019 Kcor camera foucs and tip/tilt alignment today . Distrotion grid put in. Cameras aligned in tip/tilt and focused. Took a few minutes of data with the distortion grid in.18:55:48-18:59:21 Grid was removed and winter occulter reinstalled. I think I breathed (a little heavy) into the occutler station when tryi gn to reinstall the occulter so we saw a watervapor film on the lens until that evaporated. NOTE: Both camera stages appear to be at the end of the vertical range of travel while apparently being too low relative to the beam. Not sure if this means the mounts were design/built incorrectly or if we have a misaglinemeth problem somewhere such that the beam coming out of the PBS is in the wrong place. end GENERAL COMMENT BY berkey: Fri Mar 08 19:35:08 GMT 2019 Taking data. end Fri Mar 08 19:35:19 GMT 2019 KCOR Start Synoptic Patrol GENERAL COMMENT BY berkey: Fri Mar 08 19:35:10 GMT 2019 end Fri Mar 08 20:13:49 GMT 2019 KCOR End Patrol Fri Mar 08 20:13:54 GMT 2019 KCOR Start Calibration script: c:\kcor\mlso-calibration22deq-20171025.ini Fri Mar 08 20:29:53 GMT 2019 KCOR End Calibration Script Fri Mar 08 20:30:11 GMT 2019 KCOR Start Synoptic Patrol Fri Mar 08 20:30:14 GMT 2019 KCOR Start Synoptic Patrol GENERAL COMMENT BY berkey: Fri Mar 08 22:04:43 GMT 2019 Starting to see some clouds in the S/SW. Looks like they could block the sun at some point soon.
