GENERAL COMMENT BY berkey: Thu May 23 02:07:21 GMT 2019

I am not sure why but the kcor modulator never came up to temp today. Was in the 20c range when we opened and now it is up to 30C, but it should be 35.

ILX looks to be in output mode and hitting current limit so I think it is trying to warm up the modulator.
