GENERAL COMMENT BY berkey: Fri Jul 12 17:49:15 GMT 2019

Cirrus looks to be starting to break. Not super coronal but better.

GENERAL COMMENT BY berkey: Fri Jul 12 17:50:18 GMT 2019

PM Blew off Kcor O1 and windows opened

____end____

GENERAL COMMENT BY berkey: Fri Jul 12 17:51:12 GMT 2019

Kcor started up in the right polarization state. Also it appears that SGS and kcor are talking.

GENERAL COMMENT BY berkey: Fri Jul 12 22:53:26 GMT 2019

Forgot to calibrate kcor this morning.

Taking a high aerosol calibration set.

KCOR COMMENT BY berkey: Fri Jul 12 23:51:02 GMT 2019

Spare O1 in kcor testing out first contact cleaning method.

By eye things looked pretty good near the center of the array, but there was artifacts seen near the outer edge of the lens related to a incomplete peel of the product off the lens.

In this test we are just hoping to see a reduction/elimination of the big bullet holes in near the occulter.

Sat Jul 13 00:09:41 GMT 2019 SGS Alignment complete

GENERAL COMMENT BY berkey: Sat Jul 13 00:10:15 GMT 2019

Saw a very minor improvemnet over the first contact lens condition on Wednesday morning. The occulter sized artifact on the NE limb appears to be gone. But the multiple spots on the SE limb remain unchained.

Not sure what this means.
