GENERAL COMMENT BY waters: Thu Feb 27 21:41:40 GMT 2020
Did an oxygen tank check with Allen. Found a mysterious red plastic cap attached to the regulator that belonged to the bot
tle and should have been removed when the bottle was unwraped; this made it a bit hard to remove the regulatory to check t
he other bottle.
 We checked the first bottle therefore, and found that our regulator was leaking around the pressure gauge. With the wond
erful help of Allen, we removed the pressure gauge and wraped some plumbers tape around it to help create a better seal. T
his helped but since our regulator has a plastic white ring to ceate a seal between bottle and regulator rather than a bla
ck rubber one, we still have a small leak around where the bottle meets regulator. Allen and I rotated it a bit to see if
that helped and luckily it did. We were able to get a proper read from both bottles, which are currently full.
  end

GENERAL COMMENT BY waters: Fri Feb 28 01:24:37 GMT 2020

Clouds coming from the Northeast look dark and low, closing the dome just in case

__end__

GENERAL COMMENT BY waters: Fri Feb 28 02:25:02 GMT 2020

Sky was bright at start up but mellowed as the day went on, however, the aerosols picked up as well. Low clouds came in the afternoon.
