KCOR COMMENT BY berkey: Sat Mar 14 00:28:03 GMT 2020

I worked a little bit on th kcor focus code to give better results when we have high aerosols. The new code will allow f or a copule itteration of the focus routine with meidan filtering of the camera sharpness at each focus position. The def ault behavior so act identically to the old version.

Changes were not tested on the sun, but using engineering data the algorithim gives resonable resuts. Please email or call me if there are any issues with this code on the sun.
