Mauna Loa Solar Observatory Observer's Log  
-----

Wed Mar 18 17:57:54 GMT 2020

Year: 20 Doy: 078

Observer: berkey

WEATHER COMMENT: berkey: Wed Mar 18 18:03:46 GMT 2020

Temp: 39.2f, Humidity: 89%, Pressure: 28.799in, Wind: 10mph from 249deg, Skies: heavy overcast. Based on forecasts and satellite data travel to the observatory looked difficult at least for now I am working from home. Looking at webcams there is less ice on the mountain than I expected so roads may have been easily passable after all; but conditions do still appear to make opening impossible.
