Doesn't seem like blowing off the 01 worked. I did see some dust but it looked like it was on the backside.

GONG COMMENT BY waters: Sun Apr 19 22:06:35 GMT 2020

Went down to the GONG shelter and opened the door since the temp_tbl was just under it's upper limit. Will go back down and close it when the temperature has dropped or before I head down, which ever comes first
