GENERAL COMMENT BY lisapg: Thu Aug 06 22:21:43 GMT 2020

Fog just to the West of the observatory and low clouds seem to be coming in fast. Kcor stopped and dome closed just in case

GENERAL COMMENT BY lisapg: Thu Aug 06 22:23:27 GMT 2020

Had to reload images for the streams to work. Looks like there is something that is causing a bright spot in the Northeast edge of the images. If the Sun comes out again, I'll try to take a look at what might be causing it.

WEATHER COMMENT: lisapg: Fri Aug 07 01:27:57 GMT 2020

Sky didn't clear. Not a good day for data unfortunately. Hope tomorrow is better.
